or

Pavlova with Fresh Fruit

Tea & Coffee Station

Dean Doyle with Sophistication

Dean Doyle with Sophistication is a versatile four-piece band known for their lounge music spanning from the 1930s to the 1970s, including some current hits. Influences include Sinatra, Dean Martin, Elvis, Tom Jones, and Engelbert Humperdinck, with themed and entertaining shows.

The band consists of experienced professionals: Dean Doyle, a former singer and trombonist with a Bachelor of Music/Teaching, is the founding member alongside Paul Belsham (and we remember the recently retired Narelle Harris). For the past 15 years, Dean has led the band, recently also directing The SCREAM Jazz Orchestra on the Sunshine Coast. The band regularly performs at the Ballina RSL Club and features a new bass player, Tina Rogers, a seasoned musician with a rich background in musical performances across Australia and with the Queensland Pops Orchestra. Paul Belsham, an accomplished drummer and musical director with a long career in New Zealand and Australia, co-founded the band. Glen Shepherd, the new pianist, brings a jazzy energy to the band with extensive experience in various music genres and a knack for technology. Together, Dean Doyle with Sophistication continues to delight audiences with their performances.

CELEBRATE

Monique Feain's Silver Sweethearts

Monique's amazing adult dance community classes have slowly been developing a few demonstration show dances (Ballet, Soft Shoe, Gypsy, Broadway, Cabaret, seated dance styles) and are delighted to be involved in the celebration of NSW Seniors Week Festival at Ballina RSL, showcasing the talents of their senior dancers.

Monique has also developed and delivered classes to many local Northern Rivers Retirement Resorts and Aged Care Homes as well as offering Community Classes at her Wollongbar studio. Monique is proud of her very well received and popular Seated Song and Dance program and would love to get a group of participants to demonstrate a number or two.

Set 1

Ballet Port de Bras

Gypsy 1
